EDUCATION

MSc Bioinformatics <i>University of Nantes, France</i>	2024 – 2026
BSc Life Sciences <i>University of Nîmes, France</i>	2020 – 2023
French Scientific Baccalaureate (Biology specialisation) <i>Institut Emmanuel d'Alzon, Nîmes, France</i>	2020

RESEARCH & PROFESSIONAL EXPERIENCE

Centre d'Anthropobiologie et de Génomique de Toulouse (CAGT) <i>MSc Research Internship — Toulouse, France</i>	Mar. 2026 – Aug. 2026
▶ Designed and implemented a Snakemake pipeline for ancient DNA (aDNA) analysis, taking BAM or VCF files as input and generating comprehensive per-sample phenotypic reports. ▶ Implemented a genomic imputation module using GLIMPSE2 to improve phenotypic inference on low-coverage aDNA data. ▶ Developed a methodological validation framework using GARGAMMEL (aDNA simulation) to train XGBoost reliability models, enabling confidence scoring of phenotypic predictions on simulated datasets. ▶ Pipeline scope: quality control, contamination assessment, pigmentation and morphological trait inference, imputation, and automated HTML reporting.	
Institut de Génomique Fonctionnelle (IGF, CNRS/INSERM) <i>MSc Research Internship — Montpellier, France</i>	Mar. 2025 – Aug. 2025
▶ Modelling of synaptic signalling pathways using ordinary differential equations (ODEs). ▶ Developed the SigmaView application to predict dendritic spine annotation on biological samples. ▶ Applied computational neuroscience and systems biology approaches.	
ENEDIS <i>Web Developer — Nîmes, France</i>	Aug. 2024 – Sep. 2024
▶ Developed internal web applications (SQL, PHP, HTML) and contributed to database management. ▶ Improved internal user interfaces.	
ACE Hotel Travel <i>Front Desk Receptionist — Fabrègues, France</i>	May 2023 – Oct. 2023
▶ Guest relations, reservation management and administrative support.	
VET THAU Veterinary Clinic <i>Intern — Gigean, France</i>	Nov. 2023 – Dec. 2023
▶ Observation of veterinary procedures and animal handling.	

SKILLS

Bioinformatics & NGS: Snakemake, SLURM, GLIMPSE2, GARGAMMEL, sam/bcftools, aDNA pipelines
Machine Learning: XGBoost, Unet2D/3D, CNN, simulation-based validation
Programming: Python (NumPy, Pandas), R, SQL, PHP, HTML, C++
Tools: VSCode, Windsurf, GIMP, OBS, CapCut, XPPAUT
Languages: French (native) · English C1 (advanced) · Spanish B1 (intermediate)
